MANAGEMENT DISCUSSION & ANALYSIS

MACRO ECONOMIC ENVIRONMENT

The year 2012 had been a year of slow growth world over and as per IMF forecast Global Economy is likely to show a growth of 3.3% during 2013 as compared to growth of 3.2% during 2012. The Global Economies witnessed a subdued growth with diverging growth paths across major economies. US economy which has registered a modest recovery is again subject to the adverse impact of the budget sequestration which will gradually gain pace during 2013. Japan's economy has shown signs of improvement on account of monetary and fiscal stimulus undertaken. The sovereign debt crises and the danger of a banking system meltdown in peripheral euro zone countries coupled with contraction in its major economies like Germany has resulted in negative growth in Euro zone.

The growth in the Emerging Market Economies which are viewed as growth engines of the world economy world over; have also slowed down with Brazil and South Africa registering accelerated growth where as Russia, China and India recorded a lower growth.

According to the Central Statistics Office's advance estimate of GDP growth, Indian Economy is expected to grow at 5% during the year 2012-13 as compared to a growth of 6.21% registered during 2011-12. This has been mainly on account of weak industrial activity compounded by domestic supply bottlenecks and slackening of external demand. This has also slowdown the growth in the service sector which has been the main driver of the growth.

The Reserve Bank of India in order to strike a balance in growth- inflation dynamics have initiated various measures during 2012-2013 to provide greater liquidity to financial system. This has resulted in moderating the headline inflation within its acceptable level. The food inflation as measured by new combined (rural and urban) consumer price index (CPI) remains in double digit is a cause of concern. The measures initiated are expected to result in moderate growth in GDP in the second half of 2013-2014.

REVIEW OF OPERATIONS & SEGMENTAL PERFORMANCE

Virtually there was no business activity during the year under review. The Company was having lack of requisite capital to carry any business during the year and further the Company did not manage to borrow fund from Money Market due to the fear of seizing the same by REC to recover their debt. Only source of Income was by way of interest income as well as commission received on few dealings between parties which was being arranged by the Company.

During the year, the Company registered a gross income of ₹ 13.05 Lac as compared to ₹ 15.34 Lac in previous financial year. PBT/PAT Margin during the year remains negative to ₹ 1732.59 Lac in comparison to last years' figure of Loss of ₹ 1.33 Lac.

BUSINESS SEGMENT

Virtually there were no business activities during the year under review and thus there is no reportable Segment as required under AS17 issued by the Institute of Chartered Accountants of India.

OPPORTUNITIES

The Indian money market is "a market for short-term and Long term funds with maturity ranging from overnight to one year and includes financial instruments that are deemed to be close substitutes of money. It is diversified and has evolved through many stages, from the conventional platform of treasury bills and call money to commercial paper, certificates of deposit, repos, FRAs and IRS more recently.

The Indian money market consists of diverse sub-markets, each dealing in a particular type of short-term credit. The money market fulfills the borrowing and investment requirements of providers and users of short-term funds, and balances the demand for and supply of short-term funds by providing an equilibrium mechanism.

In Stock Market or Capital Market, the first and foremost thing of strength is its ability to provide high return. SEBI is a regulatory body of Indian stock market which protects the interest of the investors which is an added benefit of Stock Market. Large number of securities which provides medium for investment and thus people can make money by way of investing wisely in Stock Market. Large numbers of Brokers are there in Market who plays a role of facilitator for investment.

THREATS & CONCERNS

The Indian economy is caught between low growth and stubbornly high inflation. Last month, the International Monetary Fund (IMF) revised the year-over-year GDP growth forecast of India to 5.7 percent for 2013, down from its January estimate of 5.9 percent. The IMF attributed structural factors as the primary reasons for the poor performance, rather than the cyclical factors cited by the government last month. Additionally, the IMF expects consumer-price inflation to remain at around 10 percent in 2013 due to a rise in food and fuel prices. Lately, there have been signs of easing inflationary pressures. The wholesale-price inflation has steadily decreased since late 2012, while consumer-price inflation went below 10 percent this May, as the economy operates below capacity. However, the government's attempt to reduce the fuel subsidy bill by raising administered fuel prices will likely reverse the fall in inflation in the remaining part of the year.

The situation for India is unique because both fiscal and monetary policies have had limited flexibility to bail out the economy. High fiscal and current-account deficits restrict the government's ability to undertake proactive stimulus programs to boost the economy. The level of domestic inflation remains higher than the Reserve Bank of India's (RBI's) comfort level, which limits the RBI's ability to ease monetary policy further. Despite such pressures, the RBI is expected to reduce the policy rates, though marginally, in order to boost economic activity in the country.

Fiscal deficit is expected to be 5.3 percent of GDP in 2012-2013, while the current account recorded the largest-ever deficit of 6.7 percent of GDP in the third quarter of 2012-2013. The government's strategy of fiscal consolidation has repeatedly gone off course since 2008 due to a series of unfavorable developments. Since last September, the government has taken bold measures to cut down fuel subsidies to prop up public finance, helping the government to restrict the fiscal deficit within the revised target of 5.1 percent of GDP. However, with general elections being just a year away, progress in this direction will be limited and even likely reverse.

The Company has aligned its policy on risk assessment in line with global approach and risk assessment reports are reviewed on regular intervals.
