OVERVIEW OF ECONOMY

Indian economy is expected to grow marginally higher at 7.5 per cent during the year compared with 7.2 per cent in 2014 and interest rate cuts will buttress private sector spending, said a group company of global rating agency Moody's.

"Our tracking model suggests that first quarter GDP growth is tracking around 7.3 per cent, a slowdown from prior quarters. But we expect this softness will prove temporary with improving domestic demand to help India's GDP grow 7.5 per cent for all of 2015," Moody's Analytics said in a study.

Earlier in the day, Moody's Analytics had put its growth estimate for the year 2015 at 7.3 per cent, which it later "amended" to 7.5 per cent.

Earlier this week, International Monetary Fund projected that India will overtake China as the fastest growing emerging economy in 2015-16 by clocking a growth rate of 7.5 per cent, helped by its recent policy initiatives, pick-up in investments and lower oil prices.

World Bank too has similar GDP growth forecast for India for the current fiscal year.

Management Discussions & Analysis

MACRO ECONOMIC ENVIRONMENT

The Indian economy is reviving, helped by positive policy actions that have improved confidence and by lower global oil prices, says the IMF in its annual assessment of the Indian economy

To continue on this trend, India needs to revitalize the investment cycle and accelerate structural reforms, says the report.

The Indian economy is the bright spot in the global landscape, becoming one of the fastest-growing big emerging market economies in the world.

“Growth numbers are now much higher and the current account deficit is comfortable, in part due to the fall in gold imports and lower oil prices,” said Paul Cashin, IMF Mission Chief for India. “New investment project announcements have started to pick up, particularly in the power and transport sectors.”

He also noted that bolstering financial sector health and further financial inclusion would support growth going forward.

While the country is well placed to cope with external shocks, there are possible risks on the horizon, both external and domestic. “Spillovers from weak global growth and potential global financial market volatility could be disruptive, including from any unexpected developments as the United States begins to raise its interest rates,” says Cashin.

On the domestic front, the weaknesses in corporate balance sheets, especially in light of the increase in corporate leverage of the past few years and worsening bank asset quality bear watching, as they could weigh on growth.

REVIEW OF OPERATIONS & SEGMENTAL PERFORMANCE

Gross Sales/Revenue during the year was ₹ 25.05 Lac in comparison to last financial year of ₹ 22.37 Lac. However in term of Net Earnings, the Company has suffered net loss of ₹ 3.78 Lac in comparison to last years’ loss of ₹ 12.52 Lac.

BUSINESS SEGMENT

Virtually there were no business activities during the year under review apart from rare investment activities in Shares & Securities, thus there is no reportable Segment as required under AS17 issued by the Institute of Chartered Accountants of India.

OPPORTUNITIES

The capital markets have continued to scale record levels as euphoria has built up on the possible trajectory of the Indian economy. The markets seem to have priced in a favourable policy environment and a consequent increase in corporate performance in the coming years.

As is the case whenever there is a turn in the economy, capital markets take the lead as they price in future improvement in the macroeconomic fundamentals of the economy. The clear mandate given to the central government and the business friendly reforms expected as a result of this has raised the expectation of both domestic and foreign investors. Further, factors such as rising growth prospects, contraction in Current Account Deficit (CAD) as well as the recent stabilization of the rupee have all contributed to this positive sentiment. Investors have been betting heavily on the economy which has led to high growth of the capital markets. The SENSEX has witnessed a consistent rise in 2014 with a growth of around 40%, reaching record highs and crossing the 29,000 mark in January 2015.

On other front, Non-Banking Financial Companies (NBFCs) have rapidly emerged as an important segment of the Indian financial system. Moreover, NBFCs assume significance in the small business segment as they primarily cater to the credit requirements of the un-organised sector such as wholesale & retail traders, small-scale industries and

small borrowers at the local level. NBFC is a heterogeneous group of financial institutions, performing a wide range of activities like hire-purchase finance, vehicle financing, equipment lease finance, personal loans, working capital loans, consumer loans, housing loans, loans against shares and investment, etc. NBFCs are broadly divided into three categories namely (i) NBFCs accepting deposits from banks (NBFC-D); (ii) NBFCs not accepting/holding public deposits (NBFC-ND); and (iii) core investment companies (i.e. those acquiring share/securities of their group/holding/subsidiary companies to the extent of not less than 90% of total assets and which do not accept public deposits.)

THREATS & CONCERNS

Banking & Capital Markets CEOs are more upbeat about the prospects for the global economy than any other sector (56% believing it will improve over the next 12 months). Their confidence is evident in the fact that more than half are planning to increase headcounts over the next 12 months, most by at least 5%.

However, Banking & Capital Markets CEOs see over-regulation as the biggest policy threat to growth. They would prefer regulations that are clear and designed for the long-term.

On other front, more than 70% of Banking & Capital Markets CEOs see cyber insecurity as a threat to growth, more than any other sector.

Success in this market demands leaders who can manage through uncertainty and complexity as they seek to deal with regulatory change while preparing for the future. This in turn demands a clear sense of who their key customers and markets are going to be in five years' time and what investments and changes will be needed to respond. It also requires a forward looking view on how regulation will interact with the other transformational trends in areas such as cost, returns and the ability to meet customer expectations.

HUMAN RESOURCES

The Company recognizes that its success is deeply embedded in the success of its human capital. During 2014-2015, the Company continued to strengthen its HR processes in line with its objective of creating an inspired workforce. The employee engagement initiatives included placing greater emphasis on learning and development, launching leadership development programme, introducing internal communication, providing opportunities to staff to seek inspirational roles through internal job postings, streamlining the Performance Management System, making the compensation structure more competitive and streamlining the performance-link rewards and incentives.

CORPORATE SUSTAINABILITY AND SOCIAL RESPONSIBILITY

The Company constantly strives to meet and exceed expectations in terms of the quality of its business and services. The Company commits itself to ethical and sustainable operation and development of all business activities according to responsible care and its own code of conduct. Corporate Social Responsibility is an integral part of the Company's philosophy and participates in activities in the area of education and health.

CAUTIONARY STATEMENT

Certain statements under "Management Discussion & Analysis" describing the Company's objectives, projections, estimates, expectations or predictions may be forward looking statement within the meaning of applicable securities laws and regulations. Although the expectations are based on reasonable assumptions, the actual results could materially differ from those expressed or implied, since the Company's operations are influenced by many external and internal factors beyond the control of the Company. The Company assumes no responsibility to publicly amend, modify or revise any forward looking statements, on the basis of any subsequent developments, information or events.

COMPLIANCE

The Compliance function of the Company is responsible for independently ensuring that operating and business units comply with regulatory and internal guidelines. The Compliance Department of the Company is continued to

play a pivotal role in ensuring implementation of compliance functions in accordance with the directives issued by regulators, the Company's Board of Directors and the Company's Compliance Policy. The Audit Committee of the Board reviews the performance of the Compliance Department and the status of compliance with regulatory/internal guidelines on a periodic basis.

New Instructions/Guidelines issued by the regulatory authorities were disseminated across the Company to ensure that the business and functional units operate within the boundaries set by regulators and that compliance risks are suitably monitored and mitigated in course of their activities and processes. New products and process launched during the year were subjected to scrutiny from the Compliance Standpoint and proposals of financial services were screened from risk control prospective.

The Company has complied with all requirements of regulatory authorities. No penalties/strictures were imposed on the Company by stock exchanges or SEBI or any statutory authority on any matter related to capital market during the last three years.
