### COVID-19

The COVID-19 pandemic has disrupted demand and supply chains across industries, negatively impacting the business of companies and driving the global economy towards a recession. Governments in several countries have imposed stringent lockdown in a bid to contain the spread of the disease. This in turn has forced companies to reconfigure how their employees work and how their core business processes are supported and delivered. These events could cause companies to pause and reprioritize their spending on technology and business process outsourcing. However, it is becoming evident that companies that have previously digitized their operations have been more resilient. Consequently, in the medium to long term, it is very likely that businesses will continue to spend on technology related initiatives with a greater focus on automation, remote working, cloud-based applications, optimization of legacy technology costs, etc. Several sectors are also seeking technology-based solutions immediately to tackle the health and economic crises – notably in healthcare, life sciences, banking, telecommunications and essential retail.

Given the continued market volatility and uncertain economic outlook, fresh lending was opportunity driven and was directed towards good corporates/high quality promoters/relationship or strategic clients to meet their short-term liquidity requirements, more like bridge funding, on fairly attractive terms.

### PERFORMANCE HIGHLIGHTS & OUTLOOK

The performance of the Company for the year was continued to be disappointed due to lack of availability of working capital.

### ANNUAL OVERVIEW AND OUTLOOK

It has been a challenging year with several macro headwinds encompassing Industrial, Infrastructure and Real estate market. Slow economic activity and Liquidity challenges impacted the overall demand scenario in the industry. During the year Government undertook certain initiatives like reduction of corporate tax rates, creating a separate corpus for stalled real-estate projects etc. which could have positive impact in the long run.

Later part of the year also witnessed an unprecedented outbreak of Corona Virus sending global economies into tizzy, impacting supply chain as well as consumer sentiment. Complete lockdown of the country was unparalleled to any disruption experienced in the past several decades. It is feared that COVID-19 would leave a deep cut in economy and corporate financials.

During the lockdown period the Company accorded paramount priority to Employee health and welfare and ensured that its commitment towards payment to the vendors and work force are duly met. With the help of technology, the respective teams were actively engaged with Customers and Vendors. This period was also utilized to impart trainings covering a wide range of topics related to Product and Processes.

Currently there is uncertainty on pace of recovery, but Management is making sure that the organization remains fully energized during the period and ready to bounce back on the next opportunity.

These disruptions impacted the performance of the Company for the year but still managed to secure industry level growth. The Management expects that these are short term challenges and continues to pursue its long term growth strategy. We are confident to lead the recovery in a shorter period in post pandemic phase and strive to sustain profitable growth.

### INDUSTRY OVERVIEW

The Indian financial services industry is vast and diverse consisting of Banks, NBFCs, Capital Market, Insurance Sector and the new Payment Bank. India's gross national savings (GDS) as a percentage of Gross Domestic Products (GDP) stood at 30.5% in 2019. With increasing financial penetration, the opportunity in India is very high especially in the rural areas for moving from physical savings to financial savings. With increasing internet penetration and financial literacy, the future growth prospectus of financial service industry in India is very high.

### THREATS & CONCERNS

The Regulators' initiatives like identifying securities in to various categories promptly without looking to the investors' prospective, additional surveillance and fast action of regulators to clean share market will certainly pressurize traders and investors to stay away from market for the time being unless they are not able to match the pace of such quick reforms. Identification and categorization of shares in to Large, Mid and Small-cap segment will add risk and pressure for investors in near term as all additional surveillance are meant for Mid and Small-cap segment, where small investors have more investments. Investors would have been happier, if such steps were being taken after thorough research and keeping out quality stocks from the requirements of additional margin, putting them in to T2T category and allowing trading in near circuit filter of 5 or 2%.

### HUMAN RESOURCES

The Company recognizes that its success is deeply embedded in the success of its human capital. During 2019-2020, the Company continued to strengthen its HR processes in line with its objective of creating an inspired workforce. The employee engagement initiatives included placing greater emphasis on learning and development, launching leadership development programme, introducing internal communication, providing opportunities to staff to seek inspirational roles through internal job postings, streamlining the Performance Management System, making the compensation structure more competitive and streamlining the performance-link rewards and incentives.

### CORPORATE SUSTAINABILITY AND SOCIAL RESPONSIBILITY

The provision of the Section 136 and Schedule VII of the Companies Act, 2013 as well as the provisions of the Companies (Corporate Social Responsibility Policy) Rules, 2014 effective from April 1, 2014 relating to CSR Initiatives are not applicable to the Company.

## **COMPLIANCE**

The Compliance function of the Company is responsible for independently ensuring that operating and business units comply with regulatory and internal guidelines. The Compliance Department of the Company is continued to play a pivotal role in ensuring implementation of compliance functions in accordance with the directives issued by regulators, the Company's Board of Directors and the Company's Compliance Policy. The Audit Committee of the Board reviews the performance of the Compliance Department and the status of compliance with regulatory/internal guidelines on a periodic basis.

The Company has complied with all requirements of regulatory authorities. No penalties/strictures were imposed on the Company by stock exchanges or SEBI or any statutory authority on any matter related to capital market during the last three years.

## NOTES AND ACCOUNTING POLICIES FORMING PART OF FINANCIAL STATEMENTS

### A. ACCOUNTING POLICIES & NOTES FORMING PART OF THE ACCOUNTS

#### 1. Background

The company is incorporated on 23<sup>rd</sup> May 1983 at Calcutta, West Bengal, India. It is a Public limited company by its shares. The company operates in financing and Capital Market. The activities of the company include trading and investment activities in shares & other securities. The Company is also carrying financing activities.

#### 2. Statement of compliance

These financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under section 133 of the Companies Act, 2013. These financial statements have also been prepared in accordance with the relevant presentation requirements of the Companies Act, 2013. The Company adopted Ind AS from 01 April 2019.

Up to the year ended 31 March 2019, the Company prepared its financial statements in accordance with the requirements of previous Generally Accepted Accounting Principles (GAAP), which includes Standards notified under the Companies (Accounting Standards) Rules, 2006. These are the Company's first Ind AS financial statements. The date of transition to Ind AS is 01 April 2016. Details of the exceptions and optional exemptions availed by the Company and principal adjustments along with related reconciliations are detailed in Note 41 – First-time Adoption of Ind AS.

#### 3. Basis of Preparation of Financial Statements

The financial statements are prepared in accordance with the historical cost convention, except for certain items that are measured at fair values at the end of each reporting period, as explained in the accounting policies.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for leasing transactions that are within the scope of Ind AS 17 – Leases, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 – Inventories or value in use in Ind AS 36 – Impairment of Assets.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the application of the accounting policies and the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the year. Actual results could differ from those estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period; they are recognised in the period of the revision and future periods if the revision affects both current and future periods.

All assets and liabilities have been classified as current or non-current as per Company's normal operating cycle and other criteria set out in Schedule III to the Companies Act 2013 and Ind AS 1- Presentation of Financial Statements based on the nature of products and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents.

#### 4. Revenue recognition

Revenue from the sale of shares is recognised when significant risks and rewards of ownership have been transferred to the customers (which generally coincide with their delivery to customers), the amount of revenue can be measured reliably and recovery of the consideration is probable. It is measured at the fair value of the consideration received or receivable for goods supplied net of returns and discounts to customers.

Revenue from services is recognised at the fair value of the consideration received or receivable for services rendered in the periods in which the services are rendered on a prorated basis over the period or as per the terms of the contract.

Dividend income from investments is recognised when the shareholder's right to receive dividend has been established.

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal

outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

## **5. Fixed Assets & Depreciation on Tangible Assets**

All assets held with the intention of being used for the purpose of providing services and not for sale in the normal course of business are recognized as Fixed Assets and are stated at cost less accumulated depreciation after considering lease adjustment account. All costs including finance cost attributable to fixed assets till assets are ready for intended use are capitalized.

### **Depreciation and Amortisation of Tangible Assets**

Depreciation on tangible assets is calculated on a pro-rata basis. Depreciation is charged over the estimated useful life of the fixed assets on a Written Down Value Method prescribed under Schedule II to the Companies Act, 2013

Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on net basis, or to realise the asset and settle the liability simultaneously.

#### **Deferred Tax**

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period.

The Company recognises a provision when there is a present obligation as a result of an obligating event that probably requires outflow of resources and a reliable estimate can be made of the amount of the obligation. When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

A disclosure of a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation and the likelihood of outflow of resources is remote, no provision or disclosure of contingent liability is made.

A provision for impairment loss is made when the recoverable amount of the asset is lower than the carrying amount.

#### 22. De-recognition

Financial assets are derecognised when the right to receive cash flows from the assets has expired, or has been transferred, and the Company has transferred substantially all of the risks and rewards of ownership.

Consequently, if the asset is one that is measured at
